Natamax® B Plus – the best antimold solution for any bakery products

Today’s consumers want products made with natural ingredients that combine a clean label and good flavor. With Natamax® B Plus, not only do you satisfy what the consumer wants, but you also do it more cost effectively. Natamax® B Plus is a patent-pending GRAS complex composed of 12.5% natamycin and gamma- cyclodextrin that protects your product naturally while maintaining its freshness and taste for a longer period of time.

While standard natamycin has a low solubility, >98% of the natamycin in Natamax® B Plus dissolves instantly in water, creating a clear and easy-to-use solution. Thanks to its even distribution in liquids, Natamax® B Plus allows you to optimize dosages, reduce your energy and maintenance costs, while efficiently protecting your product throughout its shelf life.
Optimizing protection of baked goods

Thanks to its optimal dispersion in water, Natamax® B Plus provides more than three times the protection against mold at same dosage than pure natamycin when sprayed on baked goods.
