HEALTH & NUTRITION INGREDIENTS FOR DAIRY
We bring health to everyday life
ENHANCING DAIRY

More than ever before, today's consumers are aware of the link between food and health. This has them looking for foods that not only taste good, but are good for them. At DuPont Health & Nutrition, we strive to make healthy living an easy choice for consumers; whether they are looking for improved health or better nutrition.

Our health-promoting ingredients are paired with our functional ingredients—stabilizers, emulsifiers, enzymes and cultures—to ensure the optimum combination of taste, texture and nutritional benefits. We address the demand to improve the nutritional profile of dairy products, so that consumers can enjoy better nutrition with solutions for reducing calories, fat, sugar and salt, improving lipid profiles and ensuring an adequate fiber and micronutrient intake.

DuPont ingredients can provide physiological benefits and/or help to improve the nutritional profile of a product without compromising taste or texture. We provide solutions to the most topical health issues facing consumers today, thanks to our range of scientifically substantiated health promoting ingredients in the areas of: Immune health, Digestive health, Cardiovascular health, Weight management and Bone health.
